OUTSTANDING APPEARANCE AND HIGH PERFORMANCE

Chemilac offers a comprehensive coating solution for the ACE industry. Equipments in this segment are exposed to harsh conditions and are more prone to wear and tear. Our product offerings for this segment includes coatings that gives wide variety of color, durability, anti corrosion, excellent weathering and chemical resistance. We conduct rigorous testing to ensure the coatings meet the requirements of our clients.

2K POLYURETHANE

Our 2K urethane solutions deliver an unmatched combination of performance and long term weathering formulations customised for your needs. These products have very good resistance against weathering and have excellent gloss retention property and provide a chemical resistant long-term durable coating.

EPOXY PRIMERS

Our 2K Epoxy Primers are designed to achieve strong adhesion over a variety of substrates as it delivers excellent corrosion and impact resistance. This primer creates powerful protection for your equipment when paired with our 2K Urethane Top Coats.

1K ACRYLIC (TSA)

Our 1K Acrylic product delivers excellent weathering, corrosion and impact resistance. This can be applied on a variety of surfaces and when applied over CED primer gives outstanding corrosion resistance with High Gloss, impact and chip resistance.

HEAT RESISTANCE

Chemilac HR Paint is specially developed for various applications such as exhaust manifolds, Tractors, Truck & Earth Moving Silencers, etc where high temperature is prevalent. These high temperature resistance coatings are designed to withstand temperatures ranging from 250C to 600C while providing exceptional resistance to corrosion and thermal cycling.
